### PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center IP1c (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

## SUMMARY

25X1D

Nizhniye Taltsy Petroleum Products Storage area is located 27 kilometers (km) east of Ulan-Ude (51-50N 107-36E) and 7 km southwest of Onokhoy (51-55N 108-04E) (Figure 1). The area is served by a spur of the Trans-Siberian railroad and by a probable hard-surface, all-weather road.

The installation (Figures 2 and 3) is double-fenced and enclosed by a firebreak. It covers approximately 100 acres and contains 26 buildings including one administration building, one probable barracks building, eight probable lubri-

cants storage buildings, and 16 support/storage buildings. There are 15 semiburied and 15 vertical storage tanks in the installation.

Coverage by Mission [ ] indicates the site is occupied. Track activity is not extensive, and there has been no apparent change in facilities since Mission [ ]

This installation was covered by [ ]

[ ] missions between [ ]

## DESCRIPTION OF INSTALLATION

**Railroad Service**

The area is served by a spur from the main line.

**Road Service**

A probable hard-surface, all-weather road connects the installation with the rail line. Secondary roads and trails connect it with the surrounding area.

**Aircraft Landing Strips**

The nearest aircraft facility is Ulan-Ude East Airfield (51-51N 107-43E) 17 km west.

**Administrative and Troop Housing Area**

Area D contains one administration building, one barracks, and 14 support/storage buildings

within a compound. A wooded area may conceal other buildings.

**General Storage Area**

Area E, rail served, contains eight general storage buildings and two storage/support buildings, all probably for the storage of lubricants.

**POL Storage Area**

Area G contains 16 semiburied POL storage tanks approximately 135 feet in diameter and 15 vertical storage tanks of undetermined dimensions. There is probably one earth-covered storage tank in each of eight bunkers and two each in the other four.
